

## Mix-N-Place

The patent pending Mix-N-Place™ mixer is the fastest grout and mortar delivery system available. You can mix, dispense and place your materials with one machine. With the Mix-N-Place™ mixer, you eliminate labor time by taking the mixer to the mortar tubs instead of taking the tubs to the mixing site. You will always have fresh mortar on your mortar boards. You can grout with only two people. There is no more lifting of heavy buckets. The Mix-N-Place™ reduces labor time and fatigue and a fresh employee is a much more productive employee. Order yours today so you can enjoy all of the benefits of the Mix-N-Place™ mixer.

PRODUCTION AT THE  
PUSH OF A BUTTON

This is a picture of the Mix-N-Place™ mixer dispensing mortar into a mortar tub on scaffolding. After mixing your mortar in the Mix-N-Place™ mixer, take it to the tubs instead of tubs to the mixing site. Because of the 3/4 yard size, you can fill several tubs with one batch, reducing trips to and from the mixing site. The Mix-N-Place™ mixer can be used with a silo or bags. Since the tubs never leave the scaffolding, there is no slow down in production because of missing tubs. This allows you to always have fresh mortar on the mortar boards. Below is another picture dispensing mortar into a tub. This shows the convenience of not worrying about the potential problems with placing a tub back on the scaffolding.

## MIX-N-PLACE™ Mixer/Delivery System

Empty weight	2060 lbs 975 kg	Batch Capacity	20 cuft 0.57 cum
LXWXH	87"X42"X56"	Batch Capacity - bags	6-7 bags
Engine	Honda 13 hp	Hydraulic Tank Capacity	20 gal

- ⇒ FASTEST GROUT AND MORTAR DELIVERY SYSTEM
- ⇒ TAKE MIX-N-PLACE TO TUBS INSTEAD OF TUBS TO MIXING SITE TO ELIMINATE DOWNTIME
- ⇒ CONTINUE MIXING WHILE MOVING FORKLIFT
- ⇒ APPROXIMATE 3/4 YARD CAPACITY
- ⇒ USE WITH SILO OR BAGS
- ⇒ PLACE MANY DIFFERENT MATERIALS
- ⇒ REVERSIBLE PADDLES AND AUGER
- ⇒ EASY CLEANING
- ⇒ SAVE ON LABOR

"Our need for a grout delivery system was imperative, and the Mix-N-Place™ offered the most economical "cents". With its dual purpose operations, we were able to grout walls at less than a third of the cost of manual grouting, and have the savings of purchasing a large capacity mortar mixer as well as a conventional delivery unit. The Mix-N-Place™ is the next generation system, built to last from people in the Masonry business. Furthermore, the staff at Push Button Masonry has been great to work with on every level."

Here we show the patent pending Mix-N-Place™ mixer/delivery system being used to grout. Grouting can be done with just two people. One person is on the forklift (above) or in the crane (below) and the other controls the pour directly into the block. You can mix your own grout and place all with this one machine or you can fill with a redi-mix truck and place the grout. If the grout off the truck is too dry, you can add water and mix. This simplified method saves you labor costs and labor fatigue. Also, since you can mix and place your grout with one machine, you save on equipment costs.
