Production at the  
Push of a Button

# MIX-N-PLACE

With the patent pending Mix-N-Place, you can grout with only two people. One person on the forklift and the other controls the pour. This person simply needs to put the hose in the block. He also controls the auger and the mixing paddles with a pendant that fits into a slot attached to the hose. With the pendant in this slot, it is always with the hose. To stop the flow, turn off the auger or place in reverse. You can either mix your own grout or fill from a redi-mix truck. If the grout off the truck is too dry, you can add water and mix. Now you only need one machine to mix and place your grout.

Tool box for storing grease gun, cleaning brush, etc.

- QUALITY MANUFACTURING
- HONDA 13 HP ENGINE
- EATON/VICKERS HYDRAULIC MOTORS AND PUMPS
- DRUM BUILT FROM 1/4 INCH STEEL PLATE
- MIXING PADDLES AND AUGER OPERATE IN FORWARD OR REVERSE, INDEPENDENTLY OF EACH OTHER
- ONE YEAR LIMITED WARRANTY
- BUILT IN TOOL BOX
- REDUCE LABOR COSTS
- REDUCE EQUIPMENT COSTS

Use the Mix-N-Place for mixing and placing your mortar. Once the mortar is mixed, take the mixer to the mortar tubs instead of taking the tubs to the mixing site. Since the mixer is 3/4 cubic yard, you can fill several tubs with one batch, which saves you trips to and from the mixing sight. You also benefit from the mortar tub never leaving the scaffolding, whether it is so you always have fresh mortar or just not worrying about placing a tub back on scaffolding. If you use mortar pans, you can fill the pans directly from the Mix-N-Place, no shoveling involved. The Mix-N-Place can be used with a silo or bags.

Empty weight	2060 lbs 975 kg	Batch Capacity	20 cuft 0.57 cum
LXWXH	87"X42"X56"	Batch Capacity - bags	6-7 bags
Engine	Honda 13 hp	Hydraulic Tank Capacity	20 gal

# HAN-D-SAW

Have you ever had to decide between purchasing a portable cut-off saw or a table saw? We have come up with the solution to your problem. We have designed a table to which you attach your portable cut-off saw and convert it to a table saw. We call it the Han-D-Saw. For less money than most table saws, you can have a portable cut-off saw and a table saw. With the Han-D-Saw, you simply place your saw on the table, tighten a few bolts and you have a table saw. When you need a portable saw, loosen a few bolts and remove the saw. Since the Han-D-Saw only weighs 100 pounds, it can easily be moved. You don't need a forklift to move on the scaffolding. It is the perfect table saw for gables. It is that easy and that versatile! The table is designed to fit many saw models. Ask us if it will work with yours.

- QUALITY MANUFACTURING
- LIGHT WEIGHT, ONLY 100 POUNDS
- EASY TO MOVE
- DURABLE
- SAVE EQUIPMENT COSTS
- QUICK TO PLACE
- DESIGNED TO FIT MANY SAWS
- VERSATILE
- 41" L X 24" W X 39" H
- ONE YEAR LIMITED WARRANTY

## MORTAR TUBS

We also sell mortar tubs. The 9 cubic feet tub can be ordered with or without wheels. The tubs are made from 1/8 inch plate steel for durability. Ask us, we will ship it with your Mix-N-Place.

for video demonstrations of  
the Mix-N-Place or the Han-D-Saw.

## MISSION STATEMENT of PUSH BUTTON MASONRY

### *Our Mission:*

To provide our customers with the highest quality construction and masonry equipment that operates at the push of a button so they can reduce labor cost and fatigue.

### *Our Vision:*

Develop a team of skilled employees working together so the results are rewarding to the customers and employees of Push Button Masonry.

Our goal at Push Button Masonry is to provide our customers with production at the push of a button. We strive for the latest innovations in masonry equipment. With these, we can help you reduce manual labor and costs. A fresh laborer is a much more productive laborer. If you can reduce your costs, you will increase your profits, which seems to be the goal of every contractor out there.

Our patent pending Mix-N-Place is the fastest grout and mortar delivery system available. You can mix, dispense and place your materials with one machine. With the Mix-N-Place, you eliminate labor and forklift time by taking the mixer to the mortar tubs instead of taking the tubs to the mixing site. Because of the  $\frac{3}{4}$  yard capacity, you can fill several tubs with one trip. Also, since tubs are never missing, you will always have fresh mortar on your mortar boards. You can grout with only two people. One person is on the forklift and the other controls the pour directly into the block. You can mix your own grout and place with this one machine or you can fill with a redi-mix truck and place the grout. Since you can mix and place your grout and mortar with one machine, you also save on equipment costs.

Our latest product is the Han-D-Saw. This is a saw table for your portable cut-off saw. Place your saw in our table and you've created a table saw with minimal additional investment. When you need to use it as a portable cut-off saw, simply remove from the table. Since the Han-D-Saw is light weight, it is easy to move without a forklift. The table is designed to fit many saw models. Ask us if it will work with yours.

Call us with any of your questions. Any one of our trained sales people would be happy to help you.

**PROUDLY MANUFACTURED IN THE UNITED STATES OF AMERICA**
